Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Virgil Marsh on 4/11/07.

1. Claims 11-14 and 23-25 are deleted.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the invention relates to a catalyst and a process of using it for preparing phthalic anhydride. The catalyst comprises 2-15% vanadium, 1-15% tin, 70-97% titanium oxide and optionally up to 5% of at least one alkali metal. Many prior arts of record disclose similar catalyst but the exact percents of the elements are different. For example, DE 1943759 discloses 84-87.5% titanium, 10-12% vanadium, 2-3% potassium sulphates, and optionally up to 0.5% ZrO_2 . EP 0985648 discloses 75-90% titanium, 10-20% vanadium, 1.0-3.5% phosphorous or cesium and 0.1-2% alkali metal. US 4,469,878, discloses 67-94% titanium, 0.7-30% vanadium and 0.7-3% rubidium or 0.1-1% tin and 0.5-3% phosphorus. US '878 has tin but also has phosphorus in the same composition in place of rubidium, and requires two catalysts compositions in a single process of preparing phthalic anhydride. The instant invention requires only one catalyst composition for the same process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
